OBJECTIUS	De convivència, sensibilització i interculturalitat	The objective of the Power Point is to encourage students to take an interest in the society, geography and culture of the various countries which make up the United Kingdom. By providing a combination of important facts about the unique country and other lesser known but quirky facts about its inhabitants and their traditions.
	De comunicació i aprenentatge lingüístic	The aim of the presentation is also to introduce a broader understanding of the culture and country behind the language taught to the students. The presentation involves functional language for the students to learn and requires them to interact by asking questions and exploring the topic.

METODOLOGIA	Seqüència didàctica (pas a pas)	The duration of the activity is one hour. Before the presentation, students will be presented with a sheet of facts about the U.K. on which they have to identify which ones are true and which are false, without any help and based on their own previous knowledge. After they have completed the worksheet, the students will watch the power point and I will provide commentary for each slide, step by step. New vocabulary will be identified and explained with the aid of visual tools. Once the power point has been viewed, the students will then be required to answer a quiz about the United Kingdom, to show how much they have learnt from the activity.
	Observacions	The power point works well because the use of visual material attains the students attention. The entire activity also involves many skills, such as the students' ability to listen, discuss in groups, and work independently. In this way the activity is interesting and diverse.
