

2 Where in the World?

Global Scholars work together in a group called a collaboration with classes from different cities around the world. Together, you will explore each other's cities, investigate important issues, and take action to improve your communities.

Locate the cities in your collaboration on a map. Write down the country and continent where each city in your collaboration is located.

Challenge: Learn more about each city by doing online research. Look up the language, foods, and famous buildings in each city.

City, Country, Continent:

Example: New York City, United States, North America
