

CAMERA'S HISTORY

Charles Vicent Chevalier invented the first camera: it was made of wood. It was in 1826.

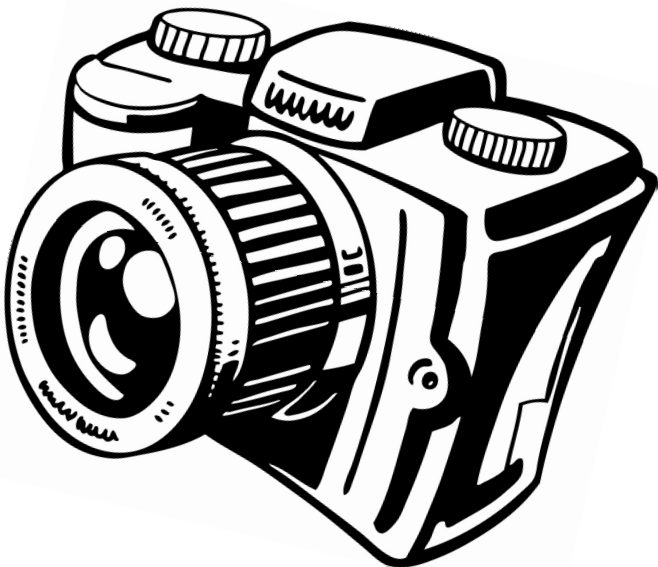

Some years later, Johann Zahn invented the photograph camera (in 1865). He used mirrors and lenses.

Zahn was German.

In the 19th century, many types of photograph cameras were designed.

The first cameras had 4 objectives or more.

Nowadays everybody use cameras. Even the mobile phones have got cameras; you can take photographs with your mobile!!!
