## Good night, planet Earth

This is what the Earth looks like at night from outer space. We can see the black sky, white clouds and in the middle, Hungary, and Ukraine in the distance. The picture was taken recently from the International Space Station. Not all the Earth is seen so brightly! Deserts, jungles and big mountains are poorly lit, and Antarctica is totally dark. There are plenty of amazing photos on the Internet. Google "earth at night from space", for example, and enjoy!

## \* Crack the code!

Change the numbers for letters using the mobile keypad. For example, if the number is 2, that letter could be A, B or C. Crack the code and reveal the message!

**Vocabulary**

- **Earth:** Terra
- **brightly:** brillant
- **poorly lit:** poc il-luminats
- **sky:** cel
- **was taken:** es va fer
