Who's driving?

This car was parked at Knowsley Safari Park, near Liverpool as an experiment. Hyundai wanted to test the car's resistance and show it on a promotional video.

When the baboons saw the car, they decided to explore and play in it. However, monkeys are very naughty and they wanted to destroy the car. They bit the seats, tried to break all sorts of things and made a mess.

How did the test end? Fortunately, the car was very strong and survived the baboons' 'attack'. It didn't need any repairs, but it needed a good shower!

Vocabulary

- **Great Dane:** gran danès
 - **living:** viu
 - **owners:** amos
 - **tall:** d'alçada
- **tiniest:** les més petites
 - **weight:** pes
 - **while:** mentre que
