

El canto del Loco

"El canto del loco" are Dani, David, Chema and Jandro, four components of the group after Iván's fall. The group formed in 1994, when the founders of the group, Iván and Dani, know themselves in a school of theatre, and they decide to join for the music.

The first thing that they do is to register David, cousin of Dani, and he was this one the one that registered Jandro and Chema.

The formation now is formed by 4 components by Dani (singer), David (guitarist), (downward) Chema and Jandro (battery). The group starts taking form when they know Pedro del Moral, producer, who they puts in touch with the record BMG Ariola. They are not late in signing a contract for the recording of his first disc " El canto del Loco ", with which they harvest big successes.

After this one they publish his second work, " A contracorriente ", with that it is possible to see the great evolution that has continued the band from his beginnings.

In 2003 "Estados de ánimo" publish and in June, 2005 already publish his fourth album of study "Zapatillas" formed by 13 songs composed by Dany and David, and polished for Chema and Jandro.

This grup is the best in this moments.
